

Features

Quiet-Revolution has been specifically designed to allow the occupant to sit, spin and be completely enclosed. The stand-alone workspace capsule provides a private haven without taking up meeting rooms, or requiring specific fire and air-conditioning compliance. The mid-frequency acoustically-insulated walls provide a sense of being in the office but out of it also.

Installing Quiet-Revolution in key workspace areas is not only good for productivity, but respects and empathizes with our greatest asset – our employees!

With well-being and productivity in mind, Quiet-Revolution provides a simple, contemporary and above all effective solution.
