

Dragonfly Meeting Chair

Features

Dragonfly was born from the likes of the body of a dragonfly which is characterised by an imbalance of weight between the legs at the front and cantilevered tail.

This observation inspired seating which thus appears to challenge gravity; the shell's vertical ribbing mimics wings. Multi-functional bases may be paired with a variety of polypropylene shell colours.

The formal design evolved into a cantilevered seat with its legs nested at the front giving the impression that the stool is defying the force of gravity. The dynamic aspect of this stool has been enhanced through the introduction of vertical fins at the rear of the backrest that allude to the design elements present in the automotive world.

Specifications

- Shell made of recyclable polypropylene, reinforced with fibreglass
- Protective polypropylene cover under seat
- Thermoplastic glides or castors
- Made in Italy
- 5 year warranty

Dimensions

Sled & Wood base
Size (mm):
460w x 540d x 785h
Seat height (mm):
450h

Castor base
Size (mm):
630w x 600d x 765-885h
Seat height (mm):
430-520h

Options

- Sled frame- Steel tube 18mm powdercoated frame
- 4-leg frame- Solid beechwood seat frame with steel with a powdercoated foot rest
- Swivel frame: 5 star base with self braking castors
- Polypropylene Finishes: Off-white, black and red
- Base Finishes: Off-white, black, red aluminum and chrome
- Standard fabric: Zen, Cosmos and Crosscheck
